

Damian Peach – Planetary Imaging

South West Herts Astronomical Society

Friday 31 March at 8 pm

Royal Masonic School for Girls, Cadogan House Hall,

Rickmansworth, Herts. WD3 4HF

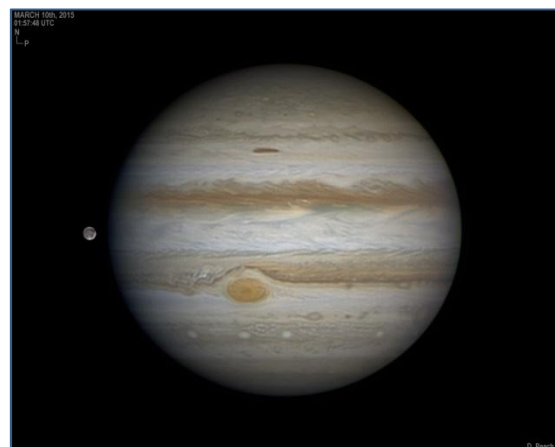

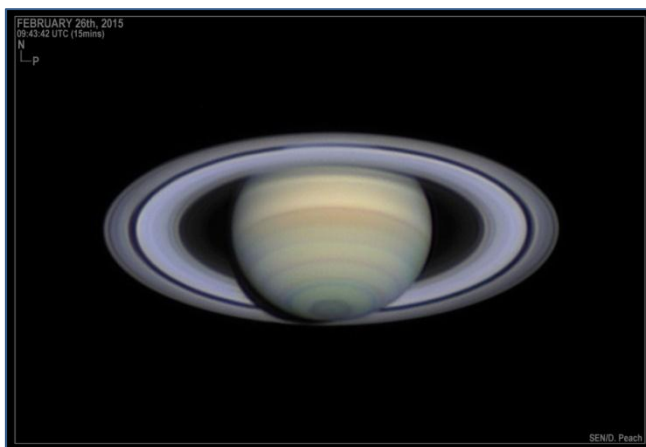

Damian Peach is a world class astro imager, specialising in capturing images of the planets. His work has been featured on many TV shows including the Sky at Night, NASA website, in astronomical magazines, newspapers and exhibitions.

Damian won Astronomy Photographer of the Year in 2011 with his stunning image of Jupiter and it's moons Io and Ganymede.

His talk to the SWHAS will discuss how to really get the most from your telescopes, cameras and software. As well Damian will be giving advice and guidance on how to start getting good quality photos of the Moon and Planets. Damian will also discuss the importance of weather and how to spot the signs of good conditions as well as observing from overseas.

A lot of useful information to get through on the evening, but there is something in there for observers and imagers of every experience level.

Admission for members is free, for non-members it is £3.00 and includes the talk, planetarium visit and light refreshments.
